

PPE FACE SHIELD

WITH SELF ADJUSTING HEADBAND

Designed and Manufactured in the UK by **DISPLAYMODE**

COVID-19
PREVENTION

Why Buy This Face Shield?

Face shields (or face visors) are a vital tool being used by front line staff to prevent the spread of COVID-19.

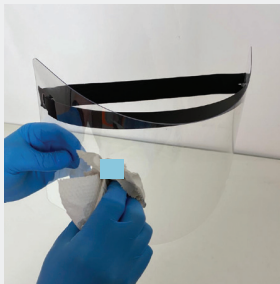

The clear visor covers the eyes, nose and mouth to provide a barrier to help prevent droplets (in breath, coughs and sneezes) being spread directly to people or indirectly via surfaces.

LET'S PROTECT OUR **NHS**

Benefits

Easy Clean

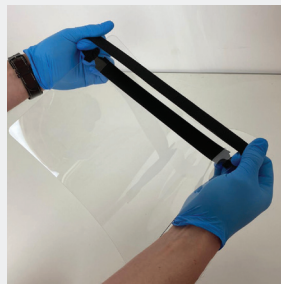

Simply use an anti-bacterial wipe to clean the visor.

This makes the face shield suitable for multiple uses by the same person.

For additional safety, that it is replaced weekly if worn in a high-use environment.

Self-Adjusting Fit

An elasticated head band allows the face shield to fit a range of head sizes.

A set of instructions comes with the shipment but fitting it could not be simpler.

Attach the visor to the headband and place the shield over your face and the elasticated headband over your head.

Comfortable

Manufactured with soft and flexible materials, the face shield is comfortable to wear for prolonged periods.

Users reported an excellent level of comfort when tested for >6 hours/day over a number of days.

The design allows for masks to be worn under the shield.

Visor Dimensions when Flat - Width: 365mm Height: 230mm

Standards and Certification

The product complies with the standard required to meet EN 166:2002 in terms of visibility, safety and comfort for their intended purposes. The test report, from the UKAS accredited laboratory, is available on request.
