

HARD HAT VISOR

UNIVERSAL PPE FOR VIRUS PROTECTION

Designed and Manufactured in the UK by **DISPLAYMODE**

COVID-19
PREVENTION

Why Buy This Face Shield?

This face shield is designed for use in environments where hard hats are a mandatory requirement.

The visor is made of tough and flexible 1mm PETG. It can be attached to most hard hats (in a matter of seconds) to provide an additional virus protection barrier.

LET'S PROTECT OUR **NHS**

Benefits

Adjustable

This visor has been designed to fit the universal gear slot on most standard hard hats.

It can be easily fitted, without tools, using the thumb screw fixings.

The mask can be adjusted to fit hard hats with and without peaks, and hats of different sizes.

Durable

Made of PETG, the face shield has good impact resistance which makes it suitable for the tough construction environment.

The visor has good chemical resistance and so can be cleaned with viricidal wipes or sprays to maintain hygiene levels.

Hinged Visor

The mask has been designed in a way which allows the visor to be lifted if required.

Even without lifting the visor, there is still enough space for safety glasses and face masks to be worn underneath.

Visor Dimensions when Flat - Width: 460mm Height: 240mm

Standards and Certification

This product does provide some mechanical protection but is not designed to replace safety glasses or other appropriate eye protection.
